

Greetings good neighbor,

Have you made your wishes known to the City? The vacant lot near you is surplus City land which will be sold for development unless the neighbors - that's you - don't ask for something else. It's your land, so you should decide.

Wouldn't you rather see a small community orchard, a vegetable garden, a climbing tree and picnic table for moms and their kids, a protected 'wildlife' area, or just a pleasant screen of trees and shrubs?

Some of us are asking the City to create Tree Banks out of the surplus Seattle City Light substation properties. Tree Banks can turn the vacant lot into any of the above. So please make your opinion known. It's super easy to do. An email is prewritten, pre-addressed, modifiable, and ready to send with the click of a button.

If you choose to send it, it won't trigger a bunch of eco-spam or advertisements. We promise.

Google up,
