Hi Devin,
That will work. Approved, Thank you.

Bill,

Can you double check these landscape plans to make sure they align with what you want. Street trees are 2' off the sidewalk and then trees were moved closer to the north property line.

Thanks,

Devin Peterson

Hi Devin,

I don't see any SCL infrastructure here, so I see no issues with planting trees here, but just be aware that if SCL does use this area for some unknown reason in the future, the trees would be under their jurisdiction. I do recommend showing the trees closer to the p/l and not centered in the easement. So, 2-feet off the edge of the driveway. With that minor change, your plan is approved.

Thanks,

Importance: High

Bill,

I am sending you this project to review because Ben is on vacation. Below is the email string regarding the project. I've attached update landscape plans for you to review. We had to relocate a street tree from the original plan due to site triangles. There is an 7.5' Easement to Seattle City Light on the north property of the site. I have relocated the one street tree to this easement . My question to you is can we plant trees in that easement? If so do you approve this new landscape plan.

Thanks,

Ben,

Yes, we can sub that variety.

Thanks!

Thanks Devin,

Can we substitute the "*Fastigiata*" variety for "*Asjes*" ? slightly shorter for possible view corridor and a slightly broader canopy.

Thank you
